READ THIS MANUAL CAREFULLY
IT CONTAINS IMPORTANT SAFETY INFORMATION

36V Series
Light Utility Vehicle

RECOMMENDED MINIMUM OPERATOR AGE: 16

THIS VEHICLE IS NOT STREET LEGAL, UNLESS SPECIFICALLY DESIGNATED AS SUCH, AND IS INTENDED FOR OFF-ROAD USE ONLY. THIS VEHICLE IS NOT DESIGNED FOR USE ON RENTAL TRACKS OR RACING.

BEFORE OPERATING THIS VEHICLE, THE OWNER AND EACH OPERATOR MUST UNDERSTAND THIS VEHICLE WAS NOT DESIGNED OR MANUFACTURED TO MEET SPECIFICATIONS FOR USE ON PUBLIC ROADS, STREETS, HIGHWAYS, AND THOROUGHFARES UNLESS SPECIFICALLY DESIGNATED AS SUCH. THE OWNER AND EACH OPERATOR MUST READ AND UNDERSTAND ALL THE INSTRUCTIONS FOR PROPER ASSEMBLY AND SAFE OPERATION, AS WELL AS THE INSTRUCTIONS CONCERNING THE ENGINE AND ALL OTHER PORTIONS OF THE VEHICLE. THIS PRODUCT IS DESIGNED TO BE OPERATED BY INDIVIDUALS 16 YEARS OF AGE OR OLDER. THIS PRODUCT IS NOT A TOY.

AMERICAN SPORTWORKS LIMITED WARRANTY

American SportWorks (hereinafter referred to as “ASW”), hereby warrants to the original purchaser, that the frame components of new ASW vehicles will be free from defects in material and workmanship. The period of warranty is (1) year from date of purchase for the component parts (except as noted below), and (1) year from the date of purchase for the frame. ASW, if notified of a defect in material or workmanship during the period of warranty, will repair or replace, at its option, defective parts at no charge, other than the reasonable cost for the transportation of the component(s). ASW will also agree to pay reasonable charges for labor, if necessary, to perform a warranty repair. Proof of Purchase must be provided to an approved ASW service center before any warranty work is performed.

The original purchaser must operate the vehicle and maintain the vehicle in accordance with the instructions provided in the Operator’s Manual, the supplements hereto, and labels affixed to the vehicle. Additionally, within (10) days of the discovery of an alleged defect, the original purchaser must contact ASW’s Customer Service Department at 1-800-643-7332, 4404 Engle Ridge Drive, Fort Wayne, IN 46804 or via the internet at www.amsportworks.com. The repair or replacement of any part or parts under this Limited Warranty shall not extend the term of the warranty beyond the original term as set forth above.

General Exclusions: This limited warranty does not cover component failure or damage caused by any of the following: abnormal strain or stress, neglect; abuse; improper assembly of components which were supplied in the factory sealed carton after the vehicle left ASW; improper maintenance, improper use of the vehicle, including, but not limited to racing, jumping, stunt driving, overloading, or any other uses prohibited by the Operator’s Manual. Additionally, this warranty does not cover component failure or damage to vehicles which are leased, rented, or used at a concession track.

Specific Exclusions: This limited warranty does not apply to components, which are subject to normal wear and tear and natural discoloration of material due to ultraviolet light. These items include, but are not limited to, the tires, brakes, throttle, shift and brake cables, drive belt, seat, lights, fasteners, decals, or cosmetic body panels. Downtime, pick-up and delivery charges are not covered by this warranty.

ASW MAKES NO OTHER WARRANTY OF ANY KIND, EXPRESSED OR IMPLIED. ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE WHICH EXCEED THE OBLIGATIONS AND TIME LIMITATIONS SPECIFIED IN THE WARRANTY ABOVE ARE HEREBY DISCLAIMED BY ASW AND EXCLUDED FROM THIS WARRANTY. ADDITIONALLY, THIS WARRANTY EXCLUDES ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES, INCLUDING BUT NOT LIMITED TO LOSS OF USE. SOME STATES DO NOT ALLOW A MANUFACTURER TO EXCLUDE OR LIMIT INCIDENTAL OR CONSEQUENTIAL DAMAGES AND, THEREFORE, THE ABOVE EXCLUSION MAY NOT APPLY TO YOU.

SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY WILL LAST, IT IS POSSIBLE THAT THE ABOVE LIMITATION MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER LEGAL RIGHTS, WHICH VARY, FROM STATE TO STATE.

BATTERY CHARGER LIMITED WARRANTY

LIMITED WARRANTY

THREE YEAR WARRANTY
Noco Genius Battery Chargers are warranted to the original retail purchaser to be free of defects in material and/or workmanship for a period of three (3) years from the date of purchase. This warranty does not cover product damage due to abuse, accidents, modifications, misuse, damage caused by owner’s failure to provide reasonable and necessary installation or care.

TO OBTAIN WARRANTY SERVICE:
Call NOCO for issuance of a returned goods authorization number before returning product.

UNITED STATES: 800-456-6626
NOCO Factory Service
P.O. Box 6539
Peoria, AZ 85385-6539

Products returned by mail should also be carefully packaged and include a note describing the nature of the problem and/or service requested. Proof of purchase or warranty authorization card must be returned with product for warranty consideration. Noco at its discretion, will repair or replace items covered under the terms of this warranty. The warranty registration should be returned to NOCO within ten (10) days from the date of purchase to validate your warranty and allow you to obtain your warranty authorization card, which gives immediate authorization throughout the U.S. and Canada. Noco products requiring service not covered under the terms of this warranty may be repaired or replaced for a reasonable fee.

“ALL INCIDENTAL AND/OR CONSEQUENTIAL DAMAGES ARE EXCLUDED FROM THIS WARRANTY INSERT. IMPLIED WARRANTIES ARE LIMITED TO THE LIFE OF THIS WARRANTY. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER LEGAL RIGHTS WHICH MAY VARY FROM STATE TO STATE”
BATTERY LIMITED WARRANTY

WARRANTY STATEMENT

U.S. Battery Manufacturing Company guarantees its products to be free of any manufacturing defects for a period of one-year. This limited warranty only covers defects in material and workmanship. The free replacement one-year period begins at date of purchase. No labor or transportation expenses are included in this limited warranty. (US 1800 and all “E” line batteries carry a reduced six-month free replacement period)

Any implied warranty of merchantability or fitness for a particular purpose shall be void and excluded subsequent to one-year from the date of purchase. The replacement of the battery is the exclusive remedy under this written warranty or any implied warranty. U.S. Battery Manufacturing Company makes no other representation or warranty of any kind, and no representative, employee, distributor or dealer has the authority to make or imply any representation, promise, or agreement, which in any way varies the terms of this limited warranty. All batteries being submitted for warranty must be returned to the place of purchase for testing and evaluation. On site service would be available in most locations at an additional charge. Service charges will vary from location to location, distance traveled and number of batteries involved.

The provisions of this limited warranty shall not apply to failure due to:

Abuse or neglect such as improper fluid levels, loose wiring, or rusted or corroded hardware; Lack of proper maintenance; Damage caused by improper installation of the battery; Neglect, breakage, freezing, fire, explosion, wreckage, the addition of any chemical, operation of the battery in an overcharged, or the operation of the battery in an uncharged condition (below half-charge – 1.200 specific gravity); and a battery charged by systems other than the original equipment type battery charger.

THIS BATTERY IS INTENDED TO BE USED BY PERSONS WITH TRAINING AND EXPERIENCE WITH BATTERIES. ANY OTHER USE REQUIRES THE LIMITED WARRANTIES EXPRESSED HERIN AND ALL IMPLIED WARRANTIES NULL AND VOID AND SAME ARE HERBY EXCLUDED.

ALSO EXCLUDED FROM THIS LIMITED WARRANTY ARE ANY AND ALL INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF USE OR REVENUE, LOSS OF TIME, INCONVIENIENCE OR ANY OTHER ECONOMIC LOSS.

Warranty Limitations

U.S. Battery’s liability shall be to replace the defective battery. Replacement shall mean furnishing a new battery or used battery with sufficient life to complete the warranty term, which is incidental or reasonably equivalent to the warranted product at no cost to the purchaser during the replacement period.

Damage not resulting from a defect in materials or workmanship or which occurs due to abuse or neglect (including failure to provide reasonable and necessary maintenance), transportation, accident or alteration is excluded from this limited warranty.
Lead-acid batteries are completely recyclable. Return whole scrap battery to distributor, manufacturer or lead smelter for recycling. For neutralized spills, place residue in acid-resistant containers with sorbent material, sand or earth and dispose of in accordance with local, state and federal regulations for acid and lead compounds. Contact local and/or state environmental officials regarding disposal information.
FOREWORD

Congratulations on the purchase of your ASW Vehicle. Before operating this vehicle, the owner and each operator must understand that, unless specifically equipped and labeled as a street legal Low Speed Vehicle (LSV), this vehicle was not designed or manufactured to meet specifications for use on public roads, streets, highways and thoroughfares. The owner, operator(s) and passenger(s) must read and understand all the instructions for proper assembly and safe operation, as well as the instructions concerning the engine and all other portions of the vehicle as described and illustrated in this manual and on the included safety DVD. This unit is not designed for children, and is not a toy.

Be sure to follow the recommended maintenance schedule and service your vehicle accordingly. Preventative maintenance is extremely important to the longevity of your vehicle.

First time drivers are urged to seek instruction from a dealer or qualified instructor before and during the initial use of this unit. It is also recommended to practice in a large open area to become familiar with the operation of the vehicle.

We hope you will have a fun, safe experience with our products and thank you again for choosing an American Sportworks Vehicle.

WARNINGS AND CAUTIONS

⚠️ This is the safety alert symbol. When you see this symbol on your machine or in this manual, be alert to the potential for personal injury.

⚠️ Read and follow all instructions in this Owner's/Operator's manual and any accompanying supplements before attempting to operate this vehicle. Make sure to view the Operations and Safety DVD.

⚠️ WARNING

Never operate this vehicle when the seat is not securely locked into position. Serious injury or death could occur due to loss of control. Always make seat adjustments with the vehicle fully stopped and the engine shut off.

⚠️ CAUTION

Indicates a potential hazard which may result in personal injury or damage to the machine.

NOTE: Use of the word “NOTE” will alert you to key information or instructions.
IMPORTANT SAFETY INFORMATION

⚠️ WARNING

Hydrogen gas is generated as a natural part of the lead acid battery charging process. A 4% concentration of hydrogen gas is explosive and could cause severe injury or death. Charging must take place in an area that is adequately ventilated (minimum of 5 air exchanges per hour).

To reduce the chance of battery explosion that could result in severe injury or death, never smoke around batteries or charge them in an area that has open flame or electric equipment that could cause an electric arc.

⚠️ CAUTION

Overfilling batteries may result in electrolyte being expelled from the battery during the charge cycle. Expelled electrolyte may cause damage to the vehicle and storage facility.

⚠️ WARNING

Always wear a safety shield or approved safety glasses when adding water or charging batteries.

⚠️ CAUTION

Electrolyte spills should be neutralized with a solution of ¼ cup (60 ml) sodium bicarbonate (baking soda) dissolved in 1-1/2 gallons (6 liters) of water and then flushed with water.

⚠️ WARNING

Do NOT place metal objects, or let them fall, onto the top of the batteries as this may cause an electrical short and the possibility of a fire.
CAUTION

The electrolyte in the battery is a solution of acid and water so skin contact should be avoided. Do not get battery acid on eyes, face, or other body parts. Flush eyes and other body parts immediately with water for at least 15 minutes if battery acid has gotten on them. Call a physician immediately.

WARNING

This vehicle may have been supplied to you completely assembled. To prevent injury or death read and follow the assembly instructions to make sure the unit was assembled properly.

WARNING

NEVER adjust, repair, or clean the machine while it is in motion.

WARNING

Check tire pressure before each use.
- Prior to operating the vehicle check and adjust tire pressure to the proper operating pressure as indicated on the sidewall of each tire or in the specification section of this manual. A tire pressure gauge is required to obtain accurate readings.

WARNING

Vehicle modification or removal of original equipment or safety decals can render the machine unsafe for operation.
WARNING

Safety decals must be replaced if they become unreadable or detached from the vehicle.
- If decals are unreadable or missing, warning of potential hazards or safety requirements may be lacking.

WARNING

The safe operation of this vehicle is dependent upon the operator's ability to exercise proper judgment.
- Operator and passenger must not be too small or too large for controlled operation.
- Operator and passenger must be of sufficient age, understanding, mental capacity, and physical capacity to safely operate the vehicle.
- Vehicle should only be operated after mature, supervised instruction and sufficient practice in an un-congested area.

WARNING

It is strongly recommended that Operator and any passengers wear a properly fitting motorcycle helmet approved by agencies such as the Department of Transportation (DOT), Safety Helmet Council of America (SHCA), or Snell Memorial Foundation (SNELL).
- Most accident fatalities are due to head injuries.
- Operator (and any passenger) should also wear face shields or goggles, boots, gloves and other appropriate protective clothing.

(See MACHINE OPERATION)

WARNING

Long hair, loose clothes, or jewelry can get caught in moving parts below and behind the seat or surrounding environment.
- Remove or tie back anything loose that can reach below and behind the seat before riding.
NEVER place hands, feet, or any body parts or clothing near the motor, wheels, belts, and other rotating parts of the vehicle while riding.
- Use caution in performing required maintenance on or near operating motor.
- Use caution after the motor has been running, since the motor and other drive components may be extremely hot.

STOP the motor and vehicle if you experience unusual noises or vibrations.
- Check the vehicle for damage.
- Excessive noise or vibration is a sign of loose or worn parts.

Keep guards in place at all times.
- Prevent accidental contact by the operator or service personnel while the vehicle is running.
- The guards over the brake, motor, axle and drive pulleys also help prevent mud and debris from coming in contact with those items.

Be sure the passenger restraint system (i.e. Seat Belt) is properly adjusted and fastened at all times during operation.
- If the passenger restraint system is not properly used by the operator and/or passengers, loss of control and possible personal injury and/or vehicle damage can occur.
When there is no passenger in the vehicle, the passenger seatbelt must be securely fastened within the vehicle.

- If the passenger restraint system is not properly used by the operator and/or passenger, loss of control and possible personal injury and/or vehicle damage can occur.

All screws, nuts, and bolts must be properly tightened to make sure the vehicle is in safe operating condition.

Prevailing-torque type locknuts must be replaced with new after the old locknuts have been removed.

- Replace with the same type of locknut to make sure they function properly. Refer to the maintenance section for more information on locknuts.

Keep the motor free of dirt and debris, especially in the drive belt area.

NEVER operate the vehicle without the operator and passengers properly seated and the restraint system properly adjusted and secured.
**WARNING**

NEVER power on the unit unless the throttle control is in its initial, fully returned, position.

**WARNING**

NEVER tamper with, alter, or change the vehicle motor governor settings.
- The governor as set by the motor manufacturer, limits maximum engine speed and protects the motor from damage.
- Excessive motor speed is potentially dangerous to operator, passengers, bystanders, and engine.

**WARNING**

Wet, slippery, rough, or sloped terrain is potentially dangerous and may result in injury if proper caution is not observed.
- ALWAYS SLOW DOWN
- Operator must use mature judgment, skill, and experience to choose a speed suitable for terrain and riding conditions in protecting operator and any bystanders.
- Operator must use mature judgment, skill and experience in choosing suitable terrain for individual operational capabilities.

**WARNING**

When turning on pavement, loose gravel, or similar surfaces, there is an increased risk in loss of control.
** ALWAYS SLOW DOWN! **

**WARNING**

ALWAYS SLOW DOWN when turning.
- High-speed turning can cause loss of control and/or possible operator injury.
- Turning on a slope increases the risk of rollover.
- Practice operation is required to coordinate turning skill.
- Failure to operate this vehicle at a safe speed while turning can result in a strong possibility of severe personal injury.
WARNING

Do NOT place metal objects, or let them fall, onto the top of the batteries as this may cause an electrical short and the possibility of a fire.

WARNING

Operating the vehicle in conditions where water, mud, snow, dirt, sand, or other debris can get into the throttle mechanism can prevent throttle return.
- This may result in the motor continuing to run and result in loss of control.

WARNING

Assembly, maintenance, and/or repair of this vehicle should only be performed by designated dealers or authorized small engine centers (for engine repairs) so that no unsafe conditions or modifications are made.

WARNING

Read and keep all supplied printed material.
- Supplements to this Operator's Manual contain updated information relative to your specific vehicle model. It is important to keep all of these documents for reference.

CAUTION

During vehicle storage and/or charging, keep it in a place where hydrogen fumes from the battery will not reach an open flame, spark, or other source of ignition. For long term storage:
- Fully charge battery and then disconnect the MAIN FUSE.
When making repairs or adjustments to the vehicle, the batteries MUST be disconnected to prevent accidental starting.

WARNING

When working on or around, the vehicle, use extreme caution to avoid contact with any potentially hot area, such as the motor and motor controller.

WARNING

NEVER operate the vehicle while under the influence of alcohol, drugs, or medication of any kind.
- Such operation is dangerous to yourself and/or others.

WARNING

Brush Bars assembled to this vehicle are for decorative purpose and limited brush protection.
- Brush Bars were not designed for roll over or to restrict all brush or tree branches from protruding into operator/passenger compartment.

CAUTION

If the vehicle should start making unusual noise or vibrating abnormally, the vehicle should be stopped and the batteries disconnected. The vehicle should then be checked for damage. Excessive noise or vibration is generally a warning of loose or worn parts.
SOME WORDS ABOUT SAFETY

The following pages present important information and recommendations to help you drive your vehicle safely. Please read through these pages thoroughly and view the Safety DVD that was included with your unit.

SAFETY LABELS

The following labels have been applied to your unit and should be considered as permanent parts of the vehicle. If a label should come off, become hard to read, or become damaged, contact your dealer or American SportWorks Customer Service department for warning label replacements.
**WARNING**

**OBSERVE THE FOLLOWING INSTRUCTIONS**

Failure to understand and follow Warnings and Instructions for the safe use and maintenance of this product may result in **Death or Injury!** This information is contained in the Warning Labels, Owner’s Manual & Supplements, Safety Video, and Engine Manual supplied with this product. Make sure that you understand and follow all Warnings and Instructions in this material.

- Always wear a D.O.T. approved motorcycle helmet, eye protection, and protective clothing.
- Check tire pressures before operating. Refer to Owner’s Manual for proper operating pressure.
- Do not operate the vehicle without the brush bars securely in place.
- Keep all covers and shields properly installed.
- Throttle and Brake Controls and Engine Stop Switch must work properly and freely before starting the engine.
- Operator must be seated, safety belt must be fastened, and brake applied before operating the vehicle.
- Never operate at speeds too fast for your skills or the conditions.
- Never attempt jumps or other stunts.
- Never operate at speeds too fast for your skills or the conditions.

If you did not receive any of the material listed above, please call 1-800-643-7332 and request to have them sent to you at no charge.

---

**ADVERTENCIA**

**OBSERVE LAS SIGUIENTES INSTRUCCIONES**

El hecho de no comprender y seguir las Advertencias y Instrucciones para el uso seguro y el mantenimiento de este producto puede causar **MUERTE O LESIÓN!** Esta información está contenida en las Etiquetas de Advertencia, Manual de Dueño y Suplementos, Video de Seguridad, y el Manual del Motor provistos con este producto. Asegúrese de comprender y seguir todas las advertencias e instrucciones suministradas.

- Siempre lleve puesto un casco de motocicleta aprobado por D.O.T., protección en los ojos, y ropa de protección.
- Checar inflación de llantas antes de operar. Consulte el Manual de Dueño para la presión adecuada de operación.
- No opere este vehículo sin las barras protectoras aseguradas en su lugar.
- Mantenga todas las cubiertas y protectores apropiadamente instalados.
- Acelerador, Botón de Apagado, y controles de frenos deben trabajar apropiadamente y libremente antes de encender el motor.
- El operador debe estar sentado, el cinturón de seguridad debe estar atado y presionar el freno antes de operar el vehículo.
- Nunca opere a una velocidad demasiado rápida para sus habilidades o las condiciones.
- Nunca intente saltos o acrobacias.
- Nunca maneje después de consumir alcohol, drogas, o otros intoxicantes.

Si Usted no recibió alguno de los materiales mencionados anteriormente, por favor llame al 1-800-643-7332 y solicite que se le envíen sin cargo.

---

**WARNING**

**PINCH HAZARD**

Exercise caution when working on drive components. Drive components turn when vehicle is in motion. Chock wheels before removing drive cover. Never remove drive cover or attempt to service with motor on.

---

**ADVERTENCIA**

**PELIGRO DE PUNTO DE AGARRE**

Tenga precaución cuando esté trabajando en los componentes de transmisión. La cadena los elementos del motor. Bloquee las ruedas antes de de extraer la cubierta de la unidad. Nunca extraiga la cubierta o intente dar mantenimiento con el motor en marcha.

---

**WARNING**

**GUARD MUST BE IN PLACE**

This guard must be in place during motor operation. Keep hands, feet, and loose garments away from motor, belt, chain and other drive components.

---

**ADVERTENCIA**

**PROTECTOR DEBE ESTAR EN SU LUGAR**

Este protector debe estar en su lugar durante la operación del motor. Mantenga manos, pies, y prendas sueltas alejados del motor, cadena, correas, y otros elementos del motor.

---

**WARNING**

**NO RIDING**

This cargo bed is intended for cargo only, not exceeding the rated weight load found in the Owner’s Manual. All occupants must be inside the vehicle and wearing the proper restraints and safety gear. Absolutely **no riding on the outside of the vehicle** or in cargo bed.

---

**ADVERTENCIA**

**LATCH DUMP BED**

Driving with the cargo bed raised is hazardous. Always lower and latch bed before driving.

---

**WARNING**

**NO SUBIR**

Esta caja de carga está diseñada sólo para carga, no supere el peso recomendado en el Manual de Dueño. Todos los ocupantes deben estar adentro del vehículo usando equipo de seguridad y restricciones adecuadas. **No subir afuera del vehículo** o en la caja de carga.

---

**ADVERTENCIA**

**SEGURO DE LA CAJA DE VOLCAR**

Manejar con la caja de carga levantada es peligroso. Todo el tiempo manténgala abajo y use el seguro de la caja cuando maneje.

---

**WARNING**

**VEHICLE MAY ROLL**

This vehicle may handle differently from any ordinary passenger car or truck. Sharp turns or abrupt maneuvers at high speeds may cause this vehicle to rollover or go out of control. Read and understand Owner’s Manual before operating this vehicle.

---

**ADVERTENCIA**

**EL VEHÍCULO SE PUEDE VOLCAR**

Este vehículo se maneja y se maneja diferentes de cualquier otro carro o camión común de pasajeros. Curvas cerradas o maniobras bruscas en alta velocidad puede causar una vuelcada o pérdida del control. Lea y comprenda el Manual de Dueño antes de operar este vehículo.

---

# QUALIFICATIONS FOR USERS

This vehicle is recommended for use by operator and passenger with a minimum age of sixteen years. Vehicles are intended for use by operators who meet the physical and cognitive capabilities set out by the manufacturer in the material provided with the vehicle.

## Consumer Responsibility for Safe Use and Maintenance of a Vehicle

Note: For the purpose of the following, if not specified, an engine is defined as gasoline powered and motor is defined as an electrical device.

| 1. | Vehicle shall not be modified from the manufacturer’s original design and configuration. |
| 2. | Vehicle shall not be used to perform racing, stunt riding, jumps, spinouts, donuts, or other maneuvers as they may cause loss of control. As such, these activities are likely to result in possible injury to the operator, bystanders, or both. |
| 3. | Prior to each use, the operator shall perform the preoperational checks specified by the manufacturer, and further verify: |
| a. | Smooth throttle operation and positive return of the pedal and additionally for gas engines, of the throttle linkage, to a closed throttle position when released; |
| b. | That the throttle cable and linkages operate properly and the throttle cable or other linkages be adjusted properly for gas engines; |
| c. | That the steering linkage is adjusted and operates smoothly; |
| d. | That the engine stop switch is properly functioning for gas powered models or the keyed ignition switch is functioning properly for electric models; |
| e. | That all guards originally supplied by the manufacturer are in proper place in serviceable condition; |
| f. | That engine idle speed is below the point of clutch or torque converter engagement for gas models; |
| g. | That the gas tank is in good condition and the proper gas cap is fastened securely for gas models; |
| h. | That the braking system is functioning properly; |
| i. | That all safety labels are in place, legible and understood; |
| j. | That any and all axle guards as applicable to the model, such as chain guards, belt guards, torque converter covers, or other covers or guards, supplied by the manufacturer are in place and in serviceable condition; |
| k. | That tires are in good condition, inflated properly, and have sufficient tread remaining; and |
| l. | That all fasteners are in place and tightened securely. |
| 4. | Vehicle engines shall not be started, or motors powered on, unless the operator is seated in proper position for vehicle operations and the brake fully engaged. |
| 5. | Long hair, loose clothes, or jewelry can get caught in moving parts below the seat or surrounding environment. Remove or tie back anything loose that can reach below or behind the seat before riding. |
| 6. | Vehicles shall only be fueled or charged by an operator knowledgeable with regard to proper fueling and charging techniques. |
| 7. | All operators or riders shall be knowledgeable, capable, and have the cognitive capacity to operate the vehicle safely, including those items specified in 1 through 6. |
| 8. | Vehicle operators and passengers shall adhere to all manufacturer’s recommendations and instructions, as well as comply with all laws and ordinances, as well as: |
a. Operators shall stay seated with both hands on the steering wheel and both feet in the vehicle at all times, whether moving or stationary, unless the vehicle is stopped completely and the engine has been shut off or the motor powered down.
b. Passengers shall remain seated with arms and legs inside the vehicle at all times during vehicle operation.
c. Shall observe minimum age restrictions.
d. Shall not ride the vehicle if long hair, loose clothes, or jewelry reach below or behind the seat.

**WARNING**

Long hair, loose clothes, or jewelry can get caught in moving parts below and behind the seat or surrounding environment. Remove or tie back anything loose that can reach below and behind the seat before riding.

e. Shall not allow smoking in vehicle.
f. Persons under the influence of drugs, alcohol, or intoxicants shall not supervise, operate, or ride in a vehicle.
g. Vehicles shall operate only on a surface or terrain recommended by the vehicle’s manufacturer.
h. Vehicles shall not be operated on roads, streets, highways, or any other location where road vehicles are intended to travel unless specifically designed and designated for such use.
i. Vehicles shall be operated only with adequate lighting and under conditions of suitable visibility.

9. Persons with the following conditions shall not ride in or operate a Vehicle:
a. Those with heart conditions
b. Pregnant women
c. Persons with head, back, or neck ailments, or prior surgeries to those areas of the body.
d. Persons with any mental or physical conditions, which may make them susceptible to injury or impair their physical dexterity or mental capabilities to recognize, understand, and perform all of the safety instructions, and be able to assume the hazards inherent in vehicle use.

10. Vehicle shall not be used to:
a. Transport a passenger, or passengers, except in the seating area(s) provided.
b. Transport materials or equipment in excess of the rated cargo capacity;

11. Vehicle operators always shall use appropriate protective clothing, including but not limited to a motorcycle type helmet and eye protection, with appropriate certification, and any other equipment recommended by the vehicle manufacturer including gloves, footwear, long sleeve shirts, and long pants.

12. No operator or other person shall contact any portion of the engine, wheels, or drive train for any purpose including maintenance until the engine or motor has been turned off and allowed to cool, and the vehicle is in a stable and stationary position.

13. Passenger restraints must be used in accordance with, and limited to, the manufacturer’s guidelines.

14. Vehicle components shall be maintained and repaired in accordance with the manufacturer’s specifications and utilizing only the manufacturer’s authorized replacement parts with installation performed by designated dealers or other skilled persons.
VEHICLE CONTROLS AND OPERATION

Controls and Features

⚠️ WARNING

Do not attempt to start or operate the vehicle until completely familiar with the location and use of each control necessary to operate this vehicle. The operator must know how to stop this machine before starting and driving it.

A. Throttle

The foot pedal on the right is the throttle (See Figure), to control the speed of the vehicle. The further the throttle pedal is depressed, the faster the vehicle will travel.
WARNING

Every time, prior to starting the vehicle, check to ensure that when the throttle pedal is pushed all the way forward, it returns to its initial position when released. Do not operate this unit if pedal fails to return to the initial position. If unable to correct the problem through replacement of worn parts, contact your dealer for assistance.

B. Brake
The brake is controlled by the foot pedal on the left (See Figure). Applying pressure to the pedal draws the brake pads against the brake discs at the wheels and slows or stops the vehicle.

C. Parking Brake
This vehicle is equipped with a parking brake system. The parking brake lever can be found in front of the passenger seat just under the dash. To apply the brake, simply depress the brake pedal and pull back on the parking brake lever, locking it into position. To disengage, depress the pedal, push the thumb button located at the top of the lever and return to its original position towards the front of the vehicle.

D. Lights
This vehicle is equipped with front running lights, a rear running/brake lamp, and a rear facing cargo light. To turn the running lights on, flip the lower switch located next to the keyed ignition on the dashboard of the unit. The cargo light can be turned on by flipping the upper switch located next to the keyed ignition. (See Figure) The rear brake light will activate automatically when the brake pedal is depressed.

E. Power Outlet
This vehicle also is equipped with a 12V, 15amp power outlet for plugging in accessory items, and comes standard with a rubber cap. Do not exceed the maximum amperage rating of the plug.

F. Keyed Ignition Switch
For added security, this unit is equipped with a keyed power switch. As an added feature, all lights are turned off when the key switch is in the "OFF" position. Reference page 33 - Starting Instructions for specific instructions.

G. Rear View Mirror
The unit is equipped with a rear view mirror. Adjust the mirror such that objects can be easily seen while sitting in correct driving position.

H. Seat Adjustment
The unit is equipped with an adjustable seat. To adjust, lift the levers just in front of the seat bottom and move the seat either forward or backward. Release the levers at the desired seat location, ensuring that they both snap back into place to lock the seat.

I. Occupant Restraints
This vehicle is equipped with automotive style 3 point retracting seat belts. Insert the metal tongue into the buckle until it is securely attached. Final adjustments should be made with the This vehicle is also equipped with a passenger grab bar located on the dash directly in front of the passenger seat.
J. Under-seat Storage

This vehicle is equipped with a storage area under the seat. To access the storage area, seat belts must be unlatched and the seat must be cleared of riders or objects. Provision for a padlock or combination lock (not included) is available on the seat latch handle. To open the storage area, remove any lock and press the lever down. With the lever depressed, lift the rear of the seat and rotate forward to reveal the storage space. NOTE: The under-seat storage area is not watertight. Items that need to stay dry should be bagged or placed in a watertight container within the storage area.

K. Forward / Reverse Switch

The Forward / Reverse switch selects the vehicle’s direction of travel. To shift direction, always bring the vehicle to a complete stop. With the brake applied, press the desired direction of travel as noted on the switch and gently depress the throttle pedal. If you attempt to shift gears while the throttle pedal is depressed, vehicle power will be shut off. The key will need to be cycled off and then on to return the vehicle to normal operation.

WARNING

Failure to fully latch the seat in the closed position could result in seat movement while driving and cause serious injury or death. Always ensure that the seat is fully latched before driving.

CAUTION

Damage to the vehicle will occur if the unit is shifted into a different gear while the vehicle is still in motion. ALWAYS bring the vehicle to a complete stop before selecting a different gear.
L. Tool Holders

This vehicle is equipped with standard side mounted tool holders for safely carrying garden tools such as rakes, shovels, etc... The tool holders are rubber coated and spring loaded to keep the tool from bouncing or rattling while the unit is in motion. Shorter tools may be loaded into the tool holders provided the handle is long enough to protrude through the middle loop, and provided the head of the tool bottoms out against the rotating loop. The holders are designed to rotate in the COUNTERCLOCKWISE direction only. To insert tool:

1) Rotate the tool horizontally and slide the handle through the loop from the RIGHT side
2) Rotate the tool vertically in a COUNTERCLOCKWISE direction
3) Slide the tool downward through the second loop and onto lower tool rest

Ensure that all tools are correctly and securely loaded into the tool holders before driving. Failure to secure the tool could cause damage to the unit, and cause serious injury or death.

Long tools will extend past the overhead brush bars, increasing the overall height of the vehicle. Damage to the tool, unit or to surrounding structures will occur when driving into low overhead clearances.
Cargo Dump Bed – 250lb MAX LOAD

This vehicle is equipped with a manual rear dump cargo bed. Release levers are located on both the driver and passenger sides of the vehicle just forward and above the rear wheels. Loose cargo should be secured with a cargo net, or proper cargo straps to prevent shifting during transport. This bed is NOT designed to transport people or animals and should be used for hauling cargo only. Prior to dumping any loads, the parking brake should be applied and the keyed power switch turned to the “OFF” position. To dump the bed, unlatch and lower the tailgate. Standing to the side of the unit, pull the release lever upwards then manually tilt the bed to dump the load. After dumping, the bed and tailgate should be securely latched.

**WARNING**

Do not lean over the bed while releasing the bed latch. Loads shifted towards the tailgate may cause the front of the bed to suddenly raise when unlatched causing serious injury.

**CAUTION**

Ensure that the bed is securely latched before driving the unit. Failure to properly latch bed may result in damage to cargo, or to the unit.

M. Charge Gauge

Located on the dash, the charge gauge indicates the approximate state of charge of the batteries. The bars illuminated to the RIGHT indicate fully charged batteries.

N. TAILGATE LATCH AND REMOVAL

The tailgate on this unit has been fitted with cam over style latches. The latches are designed to secure the tailgate to the bed, while minimizing rattles. To unlatch the tailgate, depress the latch lock and pull the hasp away from the tailgate. Once unlatched, the tailgate will swing freely towards the rear bumper. To latch, simply close the gate securely against the bed tube and lock the wire hasp over the bed latch.

Removal of the tailgate requires a 10 and 12mm wrench and removal of the hinge bolts. If the tailgate is removed, temporarily install the hinge bolts into the tailgate to prevent loss of the fasteners.

O. BASIC RADIO OPERATION

An optional radio is available with this unit. Basic operating instructions, taken from the PRV-15 USER’S MANUAL, follow.

**NOTE:** For more detailed radio operation instructions, please refer to the PRV-15 USER’S MANUAL.

PAGE 25
Basic Operation

1. **POWER** Button
   Press the button to turn on or off the power. Press long for MUTE function.

2. **VOLUME+** Button
   Press this button to increase the volume.

3. ▼ Button
   Press this button to play previous track or previous AM/FM step. In AM/FM mode, press and hold this button to search previous strong signal station.

4. **BAND/▶** Button
   Pause/Radio switch button: When radio receiving, FM/AM switch. When MP3 playing, pause.

5. **VOLUME-** Button
   Press this button to decrease the volume.

6. **MODE** Button
   Press MODE to switch between AM/FM and USB/AUX IN.

7. ▲ Button
   Press this button to play next track or a next AM/FM step. In AM/FM mode, press and hold this button to search next strong signal station.

   Note: The USB has memory retention when turn off the device or switch to FM.

ARE YOU READY TO DRIVE?

Before each drive, you need to make sure that you and your vehicle are both ready to drive. To help get you prepared, this section discusses how to evaluate your driving readiness, what items you should check on your vehicle, and adjustments to make for your comfort, convenience, or safety. Before you drive your vehicle for the first time, we urge you to:

- Read this owner’s manual and the labels on your vehicle carefully.
- Make sure you understand all the safety messages.
- Know how to operate all the controls.
- View and understand the included safety DVD

Protective Apparel

Although complete protection is not possible, wearing proper gear can reduce the chance of injury should you have an accident. The following suggestions will help you choose the proper protective gear.

Helmet and Eye Protection

Your helmet is your most important piece of protective gear because it offers the best protection against head injuries. A helmet should fit your head comfortably and securely.

Open-face helmets offer some protection, but a full-face helmet offers more. Regardless of the style, look for a D.O.T. (Department of Transportation) or Snell Memorial Foundation (SNELL) sticker on any helmet you buy. Always wear a face shield or goggles to protect your eyes and help your vision.

WARNING

Operating this vehicle without wearing an approved motorcycle helmet, eye protection, and protective clothing could increase your chances of head and/or eye injury, and the possibility of death in the event of a severe accident. Always wear and approved motorcycle helmet that fits properly and wear eye protection (goggles or face shield), gloves, boots, long-sleeved shirt or jacket and long pants.

Additional Driving Gear

In addition to a helmet and eye protection, we also recommend:

- Sturdy boots to help protect feet, ankles, and lower legs.
- Gloves to help protect your hands.

Driver Training

Developing your driving skills is an ongoing process. Even if you are an experienced driver, take time to become
familiar with the controls and how the vehicle handles. Practice driving in a safe, open area to develop your skills. Do not drive on rough terrain until you get accustomed to the vehicle controls and feel comfortable with its size and weight.

---

**WARNING**

Operating this vehicle without your seat belt could cause you to be thrown from the unit, causing serious injury or death.

---

**No Alcohol or Drugs**

Alcohol, drugs and vehicles don't mix. Even a small amount of alcohol can impair your ability to operate a vehicle safely. Likewise, drugs, even if prescribed by a physician, can be dangerous while operating a vehicle. Consult your doctor to be sure it is safe to operate a vehicle after taking medication.

---

**WARNING**

Operating this vehicle after consuming alcohol or drugs can seriously affect your judgment, cause you to react more slowly, affect your balance and perception, and could result in serious injury or death. Never consume alcohol or drugs before or while operating this vehicle.
IS YOUR VEHICLE READY TO DRIVE?

Before each drive, it is important to inspect your vehicle and make sure any problems you find are corrected. A pre-drive inspection is a must, not only for safety, but because having a breakdown, or even a flat tire, can be a major inconvenience.

If your vehicle has overturned or has been involved in a collision, do not drive it until your vehicle has been inspected by your dealer. There may be damage or other problems that you cannot see.

⚠️ WARNING

Improperly maintaining this vehicle or failing to correct a problem before driving can cause an accident resulting in serious injury or death. Always perform a pre-drive inspection before every drive and correct any problems.

Battery Charging

Battery charging must take place in an area that is adequately ventilated. To reduce the chance of battery explosion, do NOT smoke around batteries or charge them in an area that has open flame or electric equipment that could cause an electric arc. Pay particular attention to natural or propane gas water heaters and furnaces. Never charge a vehicle in an area that is subject to flame or spark as hydrogen gas is generated in the charging of batteries and is explosive in concentrations as low as 4%. Because hydrogen gas is lighter than air, it will collect in the ceilings of buildings necessitating proper ventilation. Five air exchanges per hour is considered the minimum requirement.

The battery charger is located under the seat.

- Make certain that the power key is in the “OFF” position.
- Check battery fluid level to be certain that the fluid fully covers the battery plates. Fill if necessary. (See Battery Watering on Page 38)
- Plug the AC cord into a grounded outlet. If an extension cord is used, it must be a heavy duty type of AWG 12 or heavier and no more than 25 feet in length.
  - Note: A single audible "pop" may be heard. This is normal and not an indication of a charging issue.
- There are indicator lights on charger, one set for each battery, and represent the following conditions:
- Red – Battery is charging
- Green – Battery is fully charged
- Alternately flashing red and green lights indicate that either the charging leads to a battery are loose, not connected, or connected backwards.

- When indicator lights show a fully charged condition (Green lights illuminated), unplug the AC cord from the outlet.
- Recheck battery fluid level (See Battery Watering on Page 38).

Note: A fully discharged battery will take 9 – 12 hours to fully recharge.
Note: Refer to the NOCO Battery Charger Users Guide for more detailed information.

![WARNING]

Hydrogen gas is generated as a natural part of the lead acid battery charging process. A 4% concentration of hydrogen gas is explosive and could cause severe injury or death. Charging must take place in an area that is adequately ventilated (minimum of 5 air exchanges per hour).

To reduce the chance of battery explosion that could result in severe injury or death, never smoke around batteries or charge them in an area that has open flame or electric equipment that could cause an electric arc.

Pre-Ride Inspection

The following checklist should be utilized to inspect your vehicle before each use to ensure that it is in proper working order.

<table>

</table>
Starting Instructions

The following instructions list the proper method for vehicle start up.

- A full battery charge is recommended for best performance. A full charge is indicated by all GREEN lights on the under-seat battery charger.
- Fasten Seat Belt
- Depress the brake pedal
- Turn the Key Switch to the "ON" position.
- Select the desired direction with the Forward / Reverse switch.
- Gently depress the accelerator pedal to drive the vehicle.

Note: If you attempt to shift gears while the throttle pedal is depressed, vehicle power will be shut off. The key will need to be cycled off and then on to return the vehicle to normal operation.

OPERATION - SAFE DRIVING PRECAUTIONS

Off-Road Use: Unless specified as a street legal LSV, your vehicle and its tires are designed and manufactured for off-road use only, not for use on paved surfaces. Driving on paved surfaces can affect the vehicle handling, control, and cause excessive wear to your tires.

WARNING

Operating this vehicle on paved surfaces may seriously affect handling and control of the vehicle, and may cause the vehicle to go out of control.

When driving off-road, remember to always obey local off-road driving laws and regulations. Obtain permission to drive on private property. Avoid posted areas and obey "NO TRESPASSING" signs.

If your vehicle is equipped with the Low Speed Vehicle (LSV) package for street legal use it may be used on public roads (LSV requirements vary by state and may also be subject to local ordinances. Be aware of your local regulations before operating the vehicle on local public roads). Extreme care should be taken if you are driving on public streets, roads or highways, even if they are not paved. Drivers of street vehicles may have difficulty seeing and avoiding you, which could lead to a collision. This vehicle does NOT have comparable crash protection to a car or truck. Follow all safety procedures. Avoid roads with considerable traffic. Avoid driving on public roads at night or in low visibility. Never Drink and drive.
Keep Hands and Feet on Controls

When driving your vehicle, always keep both hands on the steering wheel and feet near the foot controls. It is important to remain alert and remain focused when driving the vehicle. Removing hands or feet away from the controls can reduce your ability to react and maintain control of the vehicle.

Control Speed

Driving at excessive speeds increases the likelihood of an accident. In choosing an appropriate speed, you must consider the capability of your vehicle, the terrain, visibility and other operating conditions, in addition to the skill and experience of the driver.

Use of this Vehicle on Unfamiliar or Rough Terrain

Before driving in an unfamiliar area, always check the terrain thoroughly. Don't drive fast on unfamiliar terrain or when visibility is limited (it is often difficult to react to hidden obstructions like rocks, bumps, or holes).
Maintain a safe distance between your vehicle and other off-road vehicles. Always exercise caution and use extreme care on rough, slippery and loose terrain.

**WARNING**

Failure to use extra care when operating this vehicle on unfamiliar terrain could result in the vehicle overturning or going out of control. Go slowly and use extreme caution when operating on unfamiliar terrain. Always be alert to changing terrain conditions when operating the vehicle.

Do Not Perform Stunts

You should always operate your vehicle in a safe and reasonable manner. When driving, always keep all four wheels on the ground.

**WARNING**

Failure to use extra care when operating on excessively rough, slippery or loose terrain could cause loss of traction or vehicle control, resulting in an accident or overturn. Do not operate on excessively rough, slippery or loose terrain until you have learned and practiced the skills necessary to control the vehicle on such terrain. Always be especially cautious on these types of terrain.

**WARNING**

Attempting wheelies, jumps, and other stunts increase the chances of an accident, including an overturn. Never attempt stunt riding of any type and ride responsibly. Don’t try to show off.
UNIT SERVICE

A. Front Wheel Replacement
   Do not disassemble the castle nuts when you replace the front wheels. It is only necessary to remove the 4 lug nuts to remove the wheel. (See Figure)
   Wheel nuts should be tightened and torqued to 36lb-ft.

A. Rear Wheel Replacement
   Do not disassemble the castle nuts when you replace the rear wheels. It is only necessary to remove the 4 lug nuts to remove the wheel. (See Figure)
   Wheel nuts should be tightened and torqued to 36lb-ft.

B. Front Wheel Alignment (Ref Toe Adjustment Diagram)
   The front wheels should be set with a “toe-in” from 1/4” to 3/8”. At the centerline of the tires, measure the Distance A and the Distance B. For proper toe adjustment, Dimension A should be 1/4” – 3/8” GREATER than Dimension B.
   To make adjustments:
   a. Loosen the lock nuts on both sides of Front Tie Rods.
   b. Ensure the steering wheel is centered, and adjust Dimension B by equally rotating the tie rods in or out with a 12mm wrench.
   c. After adjusting to the desired length, tighten the lock nuts against the rod end.
   d. Recheck the dimensions for proper alignment.

C. General Lubrication
   This unit has grease fittings located at several points on the suspension and should be routinely lubricated with a quality automotive style chassis lube for maximum performance. Front suspension grease fittings are located at the connection points of the upper and lower A arms. Additional fittings are located on the rear suspension links just under the dump bed.

PAGE 36
D. Cleaning Instructions
Keep your vehicle clean by using a clean rag and a mild detergent and water solution. Wipe off all dirt from around the controls. Keep the motor and belt drive system clean and clear of foreign objects. Use of a high pressure power washer may damage paint, plastics, electric components, or drive belts and is not recommended for cleaning your vehicle. Some of the electronics in the controller and charging system are sensitive to water and corrosion. The charger and controller should be protected during washing by placing a plastic bag or other protection over the top before washing. Allow for any water that does get on/in the charger to dry out before using.

E. Belt Adjustment
This vehicle is equipped with a toothed belt drive comprised of a Primary (Motor to Jackshaft) and Secondary (Jackshaft to Axle) reduction system. Belt tension is pre-adjusted at the factory and should typically not require any further adjustments. If belt slippage does occur, belt adjustments may be performed by using following the procedure.

If the belt has more than ½” of slack or “flex” then it will require adjustment. To adjust:
   a. Loosen Primary and Secondary Belt Tensioner nuts.
   b. Insert 3/8” drive ratchet into square hole
   c. Using ratchet, apply tension to belt so that there is ½” to 3/8”of slack.
   d. Tighten Belt Tensioner pivot nut (3/4” socket)
   e. Tighten Belt Tensioner clamp nut (1/2” socket)
   f. Rotate wheel and ensure that all belt teeth are engaged in pulleys
   g. Re-check belt tension
   h. Repeat steps (a) through (g) until proper tension is reached.
F. Adjustment of Front and Rear Shock

There are five adjustable positions on each shock. The center notch is the default position as set by the manufacturer (Ref Figure). Use a round nut spanner wrench to adjust the shock. To INCREASE the shock stiffness, rotate the ring to the highest (longest) setting. To DECREASE the shock stiffness, rotate the ring to the lowest (shortest) setting. Shock stiffness adjustments should be made based on the overall weight of the rider, occupant and cargo.

G. Battery Watering

The batteries supplied with this model require water. Maintaining the proper water level is required for optimum battery performance and longevity. If the battery has been discharged (partially or fully), prior to charging, there should be enough water to cover the battery plates. The water level should always be “topped off” to full after a full charge.

**Note:** Use distilled or deionized water only. Do NOT use water with a high mineral content.

**Procedure:**
1) Open the vent caps and look inside the fill wells.
2) Check electrolyte level; the minimum level is at the top of the plates.
3) If necessary add just enough water to cover the plates at this time.
4) Replace the vent caps.
5) Put batteries on a complete charge before adding any additional water (refer to the Charging section).
6) **Unplug charger and wait a minimum of 30 minutes before proceeding.**
7) Open the vent caps and look inside the fill wells.
8) Add water until the electrolyte level is 1/8” below the bottom of the fill well.
9) Clean, replace, and tighten all vent caps.

---

**WARNING**

Hydrogen gas is generated as a natural part of the lead acid battery charging process. A 4% concentration of hydrogen gas is explosive and could cause severe injury or death. Charging must take place in an area that is adequately ventilated (minimum of 5 air exchanges per hour).

To reduce the chance of battery explosion that could result in severe injury or death, never smoke around batteries or charge them in an area that has open flame or electric equipment that could cause an electric arc.
Always wear a safety shield or approved safety glasses when adding water or charging batteries.

**WARNING**

Overfilling batteries may result in electrolyte being expelled from the battery during the charge cycle. Expelled electrolyte may cause damage to the vehicle and storage facility.

**CAUTION**

Electrolyte spills should be neutralized with a solution of ¼ cup (60 ml) sodium bicarbonate (baking soda) dissolved in 1-1/2 gallons (6 liters) of water and then flushed with water.

**CAUTION**

The electrolyte in the battery is a solution of acid and water and can cause severe burns. Skin contact should be avoided. Do not get battery acid on eyes, face, or other body parts. Flush eyes and other body parts immediately with water for at least 15 minutes if battery acid has gotten on them. Call a physician immediately.

**CAUTION**

Do NOT place metal objects, or let them fall, onto the top of the batteries as this may cause an electrical short and the possibility of a fire.
**CAUTION**

The electrolyte in the battery is a solution of acid and water so skin contact should be avoided. Do not get battery acid on eyes, face, or other body parts. Flush eyes and other body parts immediately with water for at least 15 minutes if battery acid has gotten on them. Call a physician immediately.

**CAUTION**

Electrolyte spills should be neutralized with a solution of ¼ cup (60 ml) sodium bicarbonate (baking soda) dissolved in 1-1/2 gallons (6 liters) of water and then flushed with water.

**H. Storage Instruction**

If you plan to store (and not operate) your vehicle for a period in excess of 30 days, or at the end of each driving season, the unit should be set up for storage as follows:

a. Fully charge the batteries and disconnect the MAIN FUSE.
b. Make certain that the key switch is in the "OFF" position.
c. Check the batteries every 30 days and recharge as necessary to maintain the proper voltage level for the next riding season.
d. To protect the paint, plastics and upholstery, it is a good idea to keep the unit covered when not in use.

**Note:** A fully charged battery will not freeze in normal winter temperatures. A temperature of -75°F (-60°C) is required to freeze a charged battery. In comparison, a battery that is low on charge will freeze at -14°F (-25°C).

**I. Fuse Replacement**

Your unit is equipped with fuses to protect the electrical system from excessive load conditions. Should any fuse need replacement, a fuse of the same rating must be used. The fuses are:

a. Main Fuse – (1) 350 amp fuse located on the battery pack to protect the main motor circuit.
b. (1) 15 amp blade style fuse is found behind the dash to protect the keyed power.
c. (1) A single 10 amp inline fuse is located on the positive battery cable
d. (1) 15 amp inline fuse is located on the controller’s power lead.

|                   | Standard | Prevailing | Standard | Prevailing |
|                   | lb-ft    | Torque | lb-ft    | Torque |
| ¼ - 20            | 8 – 10   | 10 – 12 | 12 – 14 | 14 – 16 |
| 3/8 - 16          | 31 – 33  | 36 – 38 | 44 – 47 | 49 – 52 |
| ¾ - 10            | 257 – 266 | 277 – 286 | 376 – 380 | 396 - 400 |
ACCESSORIES

Although this electric unit is not approved for accessories such as a plow, winch, earth implement, or trailer, please visit our website at www.amsportworks.com, or your local dealer, to see the full selection of accessories that are available for this vehicle.

**CAUTION**

The electric unit is not approved for all accessories. Examples of accessories NOT approved for the electric unit are plows, winches, earth implements, and trailers.

REPLACEMENT PARTS AND SERVICE

Most replacement parts are typically available from your dealer. Because of immediate availability and convenience, it is recommended that replacement parts be ordered from an authorized dealer. Take this manual and all supplements to the dealer when ordering parts in person.

If replacement parts are not available from a dealer, they may be ordered directly from ASW at 1-800-643-7332. Orders may be subject to a minimum fee. A listing of authorized service center locations in your area is also available on our website at www.amsportworks.com or from our Customer Service department.

Record the vehicle VIN number in the spaces provided at the front of this manual. The VIN number is hard tagged on the vehicle and can be found just behind the left rear tire.
SPECIFICATIONS

DIMENSIONS
Overall length--------------------------------------------------------------- 2324mm (91.5 inch)
Overall width--------------------------------------------------------------- 1245mm (49.0 inch)
Overall height-------------------------------------------------------------- 1765mm (69.5 inch)
Wheelbase--------------------------------------------------------------- 1588mm (62.5 inch)
Track Width – Front / Rear------------------------------------------------- 1049mm (41.3 inch) / 1000mm (39.4 inch)
Ground Clearance------------------------------------------------------------ 170mm (6.7 inch)

MOTOR
Type--------------------------------------------------------------------------- 36V DC
Motor Size------------------------------------------------------------------------ 3 x 12V Deep Cycle Batteries
Starting------------------------------------------------------------------------- Keyed Electric
Charger Type----------------------------------------------------------------------- NOCO Genius

CAPACITIES
Maximum Load (Driver, Passenger, & Gear)---------------------------------------- 340Kg / 750lbs
Maximum Bed Load-------------------------------------------------------------- 114 Kg / 250lbs
Bed Capacity------------------------------------------------------------------ 0.127 cu m / 4.5 cu ft
Under-Seat Storage Capacity-------------------------------------------------- 0.09 cu m / 3.25 cu ft
Climbing Angle--------------------------------------------------------------- 10-14°
Head Light / Tail Light----------------------------------------------------------- Twin 12V 25W / 12V 10W/5W
Cargo Light-------------------------------------------------------------------- 12V 25W
Top Speed (Speed Limited)------------------------------------------------------- 18 – 20mph

CHASSIS
Brakes (Front and Rear)-------------------------------------------------------- Hydraulic disc
Tires – Front / Rear------------------------------------------------------------ 20 x 8.0-8 @ 15psi / 22 x 11-10 @ 15psi
Suspension-Front--------------------------------------------------------------- Dual A-arm with 1.8" (45mm) of travel
Suspension-Rear--------------------------------------------------------------- Spring over shock with 2.0"(60mm) of travel

WEIGHT
Dry Weight--------------------------------------------------------------------- 443Kg / 975lbs

WARRANTY
Components / Frame / Engine----------------------------------------------------- 1 year

* The specifications are subject to change without notice.
Periodic Checks & Services

The maintenance intervals in the following table are based upon average driving conditions. Driving in unusually dusty areas may require more frequent servicing.
