

ZIPPER DOOR ENCLOSURE KIT (15075)

This kit requires the use of Folding Windshield part number 2-18411

TOOLS REQUIRED*

10mm Wrench
10mm Ratchet

- 1 Remove the hard top if one is already installed. Loosely install the soft enclosure on the UTV. Install the lower straps under the UTV in a "X" formation as shown in figure 1. Snug the straps so the cover does not come loose.

fig. 1

- 2 Run the driver's side upper strap to the passenger-side, routing it under the frame. Connect it to the upper passenger-side strap as shown in figure 2.

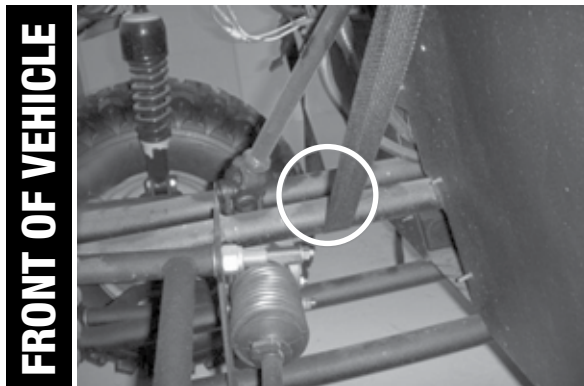

fig. 2

- 3 Run the lower strap to the driver's side routing it over the frame. Route the strap that is located below the seat frame to the front strap.

fig. 3

- 4 Route the back strap around the frame tube as shown in figure 4.

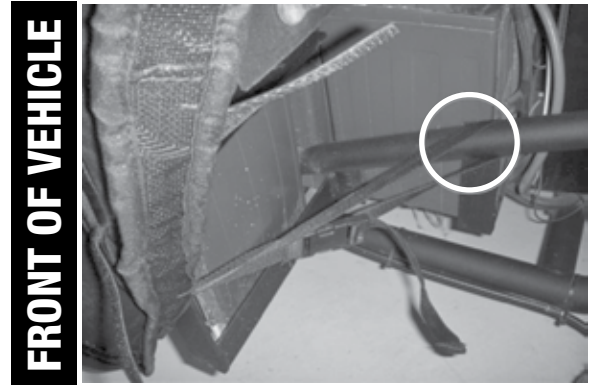

fig. 4

- 5 Apply the Velcro tape to the windshield tube and Velcro the windshield down as shown in figure 5.

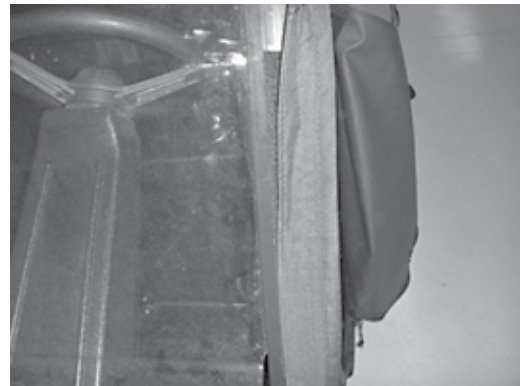

fig. 5

- 6 Velcro the straps around the cab at the top of the windshield and the straps on the windshield tube as shown in figure 6.
