**Installation Instructions**

**As illustrated below, this kit consists of:**

<table>
<thead>
<tr>
<th>Item</th>
<th>Qty.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hour meter</td>
<td>1</td>
</tr>
<tr>
<td>Electrical loom wiring</td>
<td>1</td>
</tr>
<tr>
<td>Hardware bag (2 screws, nuts and washers)</td>
<td>1</td>
</tr>
<tr>
<td>Zip ties</td>
<td>2</td>
</tr>
</tbody>
</table>

**Tools Required**

- Drill
- Screwdriver
- 3/8" wrench or socket
- Saber saw
- Masking tape

---

**Procedure:**

1. **Place masking tape on the plastic dashboard in the desired location of the hour meter.** This will prevent scratches in plastic. Use the template at right to mark a 1 ½ inch wide by 1 inch tall rectangle on the plastic dashboard in the desired location. Make sure that the wiring loom will reach from the hour meter to the terminal block under the hood (see figure 2 for suggested locations).

2. **Drill a hole in the center of the rectangle large enough to insert your sabersaw blade.** Cut out the rectangle with the saw.

3. **Insert the hour meter.** Use a marker to mark the holes on each side of the meter. Remove the hour meter and drill the holes with a 5/32" drill bit.

4. **Remove the masking tape and install the hour meter with the provided hardware.**

5. **Remove the cover from the wire distribution panel under the hood using a 3/8" wrench.** Connect the provided wires to the hour meter and to the terminal block as shown in figure 3.

6. **Replace distribution panel cover.** Fasten wires away from steering shaft and shifter controls with provided zip ties.

---

**NOTE**

The hood does NOT require removal to install this hour meter.

---

Your hour meter will now keep time when the key is in the ON position. (Even if the engine is not running.)

---

**HOUR METER KIT (2-55031)**

**NOT FOR USE ON ELECTRIC ONLY VEHICLES**

- gasoline powered
- gas/electric hybrid powered
- electric powered
